SKILLS

SOC & Incident Response : Alert monitoring and triage, SIEM-based threat detection, incident response lifecycle (Identification → Containment → Eradication → Recovery), IOC analysis, false positive reduction, playbook execution, detection rule development, escalation management

SIEM & Detection Tools : Splunk (SPL, dashboards, alerts, correlation rules, reports), Wazuh (SIEM + HIDS + FIM + Active Response), Microsoft Sentinel (KQL, analytics rules), Microsoft Defender for Endpoint, Sysmon, auditd, Windows Event Viewer

Threat Intelligence : MITRE ATT&CK, Cyber Kill Chain, IOC enrichment (VirusTotal, AlienVault OTX, AbuseIPDB), phishing analysis, malware behaviour analysis, anomaly detection, CVE vulnerability analysis, threat hunting concepts

Network & Perimeter Security : TCP/IP, DNS, DHCP, VPN, LAN/WAN, firewall configuration (pfSense), IDS/IPS, packet analysis (Wireshark), network segmentation, WAF deployment and monitoring (SafeLine), Nmap

Cloud, IAM & Compliance : Microsoft Azure, Entra ID, Azure AD, Microsoft Defender XDR, Active Directory (users, groups, OUs, GPOs), MFA, RBAC, least privilege, NIST CSF, NIST 800-53, ISO 27001 awareness, PHIPA/PIPEDA

Systems & Scripting : Windows 10/11, Windows Server, Linux (Ubuntu, Kali), macOS, PowerShell (basic), Python (basic), Bash (basic), ServiceNow ITSM, regex, technical documentation, SOC runbooks

EXPERIENCE

Helpdesk Analyst

Ada Tech Systems | IT Consulting

Dec 2024 – Present

Toronto, ON (Remote)

- Serve as the **primary IT support resource** for an IT consulting firm; independently manage end-to-end Tier 1/2 support operations across hardware, software, network, and client-facing environments with minimal supervision
- Own the full **ticket lifecycle from intake to resolution** — triage and prioritize incidents, diagnose root causes, implement fixes, and maintain detailed documentation to build a knowledge base that improves team efficiency
- Configure and deploy **workstations, printers, and mobile devices**; manage Active Directory accounts, password resets, and access provisioning; support Microsoft 365 including Outlook, Teams, and SharePoint for end users
- Assist with **new employee onboarding and offboarding**; coordinate hardware procurement; maintain accurate asset tracking records; escalate complex issues with full context and supporting documentation
- Investigate reported **phishing attempts, suspicious login activity, and unauthorized access flags**; escalate confirmed security incidents with full documentation

Helpdesk Support Analyst (CO-OP)

St. Clair College

Jan 2024 – Apr 2024

Windsor, ON

- Provided **first-level IT support** to 50+ end users in a Windows-based enterprise environment; resolved hardware, software, and network connectivity issues via ticketing system and in-person support
- Managed **Active Directory user accounts, password resets, and access provisioning** with strict adherence to access control policies; supported Microsoft 365 including MFA setup, Outlook, and Teams troubleshooting
- Configured and deployed endpoints; performed **system imaging and hardware setup**; maintained accurate IT asset tracking records and knowledge base documentation in ServiceNow
- Communicated technical solutions clearly to non-technical users with **patience and professionalism**; consistently prioritized a positive end-user experience in every interaction

PROJECTS

Splunk SIEM Threat Detection & SOC Operations Lab

Apr 2026 – May 2026

- Deployed Splunk SIEM from scratch; ingested **Windows Event Logs and Sysmon data** to build a fully operational threat detection environment monitoring real security activity across Windows endpoints
- Developed **SPL detection queries, custom dashboards, alerts, and correlation rules** targeting failed logins (Event ID 4625), privilege escalation (4688), lateral movement, and suspicious process creation
- Performed continuous **alert triage and false positive analysis**; consumed threat intelligence feeds (AlienVault OTX, AbuseIPDB) to enrich alert context and identify known-malicious IOCs
- Mapped all confirmed threats to **MITRE ATT&CK techniques**; produced structured incident reports; developed SOC procedures and security monitoring standards based on NIST CSF best practices

Wazuh SIEM — Enterprise Security Operations Lab

Mar 2026 – Apr 2026

- Deployed full **Wazuh SIEM stack** (manager, indexer, dashboard, Filebeat) with Windows 11 and Kali Linux agents; configured Windows audit policy generating **848 real security alerts** in first 24 hours of operation
- Investigated multi-stage attack (IR-2026-001) — detected brute force (T1110), encoded PowerShell (T1059.001), persistence (T1053.005); **achieved containment in 54 minutes**; produced enterprise incident report with IOC list, MITRE ATT&CK mapping, and 5 remediation recommendations
- Integrated **VirusTotal threat intelligence enrichment**, Active Response automation for IP blocking, CVE vulnerability detection pipeline, and auditd syscall-level Linux monitoring

pfSense Network Security & WAF Detection Lab

Feb 2026 – Mar 2026

- Configured **pfSense firewall** with rules, NAT, IDS/IPS integration, and network segmentation; simulated SYN flood and port scan attacks; analyzed firewall and IPS logs to identify abnormal traffic patterns and validate mitigation controls
- Deployed **SafeLine WAF**; simulated SQLi and XSS attacks; reviewed WAF alert logs; mapped attack patterns to MITRE ATT&CK Initial Access techniques; documented findings as operational security guidelines
- Conducted a **security risk assessment** of the lab network — identified vulnerabilities in firewall configuration, evaluated threat likelihood and impact, and produced hardening guidelines aligned with NIST CSF Protect function

EDUCATION

St. Clair College

Computer Systems Technician – Networking | GPA: 3.2/4.0 | Honors Award

Windsor, ON

May 2023 – Aug 2024

CERTIFICATIONS

CompTIA Security+

CompTIA

Dec 2025

ISC2 Certified in Cybersecurity (CC)

ISC2

Jan 2026

Microsoft Security Operations Analyst (SC-200)

Microsoft

May 2026

EXTRACURRICULAR ACTIVITY

Cybersecurity Blog — Medium ([@ronakonweb](#)) | Published "[5 Windows Event IDs Every SOC Analyst Should Know \(With Real Lab Evidence\)](#)" — SOC detection analysis using real lab screenshots.

BSides Ottawa — Annual cybersecurity conference; networking with security professionals; staying current on emerging threats and SOC operational practices.
