# RONAK MISHRA

ronakmishra1077@gmail.com | LinkedIn | Portfolio | +1 226-975-3578 | Ottawa, ON (Willing to Relocate)

## TECHNICAL SKILLS

**SOC Operations:** Alert monitoring, incident triage, escalation, playbook-based analysis, false positive identification, Incident Response Lifecycle (Identification, Containment, Eradication, Recovery, Lessons Learned)
**SIEM & Log Analysis:** Splunk (SPL), Wazuh, log ingestion, correlation, security event analysis
**Threat Detection & Intelligence:** MITRE ATT&CK, Cyber Kill Chain, IOC analysis, anomaly detection, threat intelligence feeds (AlienVault OTX, AbuseIPDB)
**Network Security:** Firewalls (pfSense), TCP/IP, DNS, HTTP/HTTPS, packet analysis, IDS/IPS concepts
**Security Logs:** Authentication logs, firewall logs, AV/IPS/Anti-Spam logs, endpoint telemetry, system logs
**Security Tools:** Splunk, Wazuh, Wireshark, Nmap, Sysmon, Windows Event Viewer
**Operating Systems:** Windows 10/11, Windows Server, Linux (Ubuntu, Kali)
**Scripting & Querying:** SPL (Splunk), PostgreSQL (basic), Regular Expressions (regex), Python (basic), Bash (basic)
**Reporting & Visualization:** Incident documentation, investigation reports, dashboard creation, security event visualization
**Frameworks:** MITRE ATT&CK, Cyber Kill Chain, NIST CSF

## EXPERIENCE

**Inbound Support Specialist (ISS) – Problem Solver** Oct 2024 – Present
*Amazon* *Ottawa, ON*

- Investigate and resolve operational and system-related discrepancies using internal case management tools and data analysis, applying structured triage methodology analogous to security incident investigation
- Create and manage internal tickets to track issues, document findings, and support resolution workflows
- Escalate complex issues to specialized teams with detailed context, impact assessment, and supporting evidence; apply severity-based prioritization consistent with IR triage principles
- Perform root cause analysis on recurring issues, identify patterns affecting system workflows, and contribute to process improvement documentation
- Monitor anomalies in operations and prioritize issues based on severity and business impact in a high-volume, fast-paced environment
- Maintain accurate documentation of incidents, resolutions, and trends for reporting, audit trail, and process improvement purposes
- Collaborate with cross-functional teams to resolve issues efficiently, exercising clear written and verbal communication under pressure

**Helpdesk Analyst (CO-OP)** Jan 2024 – April 2024
*St. Clair College* *Windsor, ON*

- Served as first point of contact for technical issues via ticketing system and in-person support in a Windows-based enterprise environment
- Diagnosed and resolved Level 1 hardware, software, and network connectivity issues; escalated complex cases with full context and documented findings
- Performed password resets, user access reviews, and account management in Active Directory with adherence to access control and security policies
- Supported Microsoft 365 environment including Outlook, Teams collaboration, and MFA setup guidance
- Prepared and configured endpoints for new users; maintained asset tracking documentation and IT storage organization
- Communicated technical solutions and security guidance to non-technical users in clear, accessible language

## EDUCATION

**St. Clair College** Windsor, ON
*Computer System Technician - Networking, GPA - 3.2/4.0* *May 2023 - August 2024*

## CERTIFICATES

**CompTIA Security+** Dec 2025
*CompTIA* *Click - Show Credentials*
**ISC2 - CC** Jan 2026
*LinkedIn* *Click – Show Credentials*
**CySA+** Apr 2026
*CompTIA* *Expected*

## PROJECTS

**Splunk SIEM Threat Detection Project**

- Ingested Windows Event Logs and Sysmon data into Splunk SIEM and developed SPL queries to detect failed logins, privilege escalation, and lateral movement indicators
- Performed alert triage, filtered false positives through log correlation, and followed IR lifecycle phases (Identification → Containment → Eradication → Recovery) for each detected event
- Consumed threat intelligence feeds (AbuseIPDB, AlienVault OTX) to enrich alert context and identify known-malicious IOCs in log data
- Created dashboards and visualizations to surface security event trends for reporting and investigation support
- Mapped confirmed threats to MITRE ATT&CK techniques and documented investigation findings in structured incident reports

**Wazuh SIEM & Host Intrusion Detection Deployment**

- Deployed Wazuh SIEM stack (indexer, manager, dashboard) with endpoint agents on Ubuntu and Windows 11 for centralized log monitoring
- Monitored authentication logs, file integrity (FIM), and system activity; investigated brute force attempts and unauthorized file changes
- Mapped findings to MITRE ATT&CK techniques; performed log correlation and threat analysis using regex-based detection rules
- Configured custom detection rules and alerts to reduce false positive noise and improve signal-to-noise ratio

**Network Security & Attack Analysis (pfSense Firewall Lab)**

- Configured pfSense firewall in a virtualized network environment; implemented firewall rules, NAT, and traffic filtering policies
- Simulated SYN flood and port scan attacks; analyzed AV, IPS, and firewall logs to identify abnormal traffic patterns (high SYN without ACK, anomalous source IPs)
- Proposed and tested mitigation strategies including IDS/IPS integration and rate-limiting rules; documented findings in an investigation report

**SafeLine WAF Detection Lab**

- Deployed SafeLine Web Application Firewall and simulated web-layer attacks (SQLi, XSS) to analyze detection and blocking behavior
- Reviewed WAF alert logs, mapped attack patterns to MITRE ATT&CK Initial Access and Execution techniques, and documented findings

## EXTRA-CURRICULAR ACTIVITIES

**Cybersecurity Blog - Medium** Feb 2026 - Present

Technical blog on Medium (@ronakonweb) — articles covering SIEM architecture, SOC operations, log analysis, and threat detection techniques. Example: *"Understanding SIEM: A Practical Look at Security Information and Event Management."*

## AWARDS AND RECOGNITION

**Honors Award** Sep 2023
*St. Clair College*

## LANGUAGES

**English, Hindi, Gujarati** **French** (Level 1/8, Beginner working proficiency)
