TECHNICAL SKILLS

Security Operations : SIEM monitoring, alert triage, incident detection and response, IOC analysis, threat hunting, MITRE ATT&CK, NIST CSF, vulnerability assessment

Microsoft Security (SC-200) : Microsoft Sentinel, Defender XDR, Defender for Endpoint, Defender for Cloud, Entra ID, Azure Arc, AMA, DCR, Log Analytics Workspace

Detection Engineering : KQL analytics rules, SPL correlation rules, SOAR playbooks (Logic Apps), SOC dashboards, MITRE ATT&CK-mapped detections, alert tuning

Identity & Access Management : Active Directory, Microsoft Entra ID, MFA, RBAC, Conditional Access, GPO management, user provisioning, access reviews

Network & Endpoint : TCP/IP, DNS, VPN, pfSense (IDS/IPS, Firewall), SafeLine WAF, Wireshark, Sysmon, Windows Event Log analysis, endpoint hardening

Systems & Scripting : Windows 10/11, Windows Server, Linux (Ubuntu, Kali), PowerShell, Python, Bash, ServiceNow, Azure Monitor, technical documentation

CERTIFICATIONS

Microsoft Security Operations Analyst (SC-200) May 2026

Microsoft

CompTIA Security+ Dec 2025

CompTIA

ISC2 Certified in Cybersecurity (CC) Jan 2026

ISC2

EXPERIENCE

Helpdesk Analyst

Ada Tech Systems

Dec 2024 – Present

Toronto, ON (Remote)

- Serve as primary IT support contact for 3 client organizations — manage and resolve 15+ weekly tickets covering hardware, software, connectivity, and account issues; maintain documentation and knowledge base articles to support consistent service delivery
- Administer Active Directory and Microsoft Entra ID — provision and deprovision user accounts, manage group memberships, enforce MFA policies, and conduct quarterly access reviews across client environments
- Configure and maintain Windows workstations and server environments — deploy patches, manage Group Policy, and perform remote troubleshooting across distributed client infrastructure
- Investigated and escalated **phishing attempts and suspicious login activity** — reviewed M365 Defender alerts, confirmed scope, and coordinated with client stakeholders to remediate affected accounts and document findings
- Develop and maintain IT process documentation, incident runbooks, and SOPs; communicate technical findings clearly to non-technical users and stakeholders at all levels

Helpdesk Support Analyst (Co-op)

St. Clair College

Jan 2024 – Apr 2024

Windsor, ON

- Provided first-line IT support for students and staff — resolved hardware, software, and network connectivity issues; managed ticket queue in ServiceNow and escalated complex issues to senior technicians with detailed notes
- Administered Active Directory accounts — created and managed user accounts, reset passwords, assigned group memberships, and enforced MFA enrollment across the college environment
- Deployed and configured 10+ endpoints using standardized setup checklists; performed software installations and peripheral troubleshooting; maintained accurate asset records and documentation

PROJECTS

Microsoft Sentinel Enterprise SIEM Lab

May 2026 - Jun 2026

- Engineered a full Azure-native SIEM from scratch — Log Analytics Workspace, Azure Arc, AMA, DCR — onboarding Windows 11, Ubuntu, and Kali Linux endpoints into a unified hybrid environment; authored **3 custom KQL analytics rules and 4 threat hunting queries** mapped to MITRE ATT&CK; produced a 6-panel SOC dashboard tracking live security posture metrics across all monitored nodes
- Built end-to-end SOAR automation via Azure Logic Apps to automatically block attacker IPs on confirmed threats; simulated 260 SSH brute force attempts across 3 attack waves to validate detection fidelity; led IR-2026-001 from alert through full containment and documented findings in a formal incident report

Wazuh Enterprise SIEM Lab

Mar 2026 – Apr 2026

- Deployed Wazuh 4.14.2 across a 3-node environment; ingested **848 real security alerts in first 24 hours** using 5 custom detection rules with MITRE ATT&CK mapping; integrated VirusTotal API for automated IOC enrichment and Active Response for real-time threat containment
- Led IR-2026-001 response to a simulated multi-stage attack (T1110, T1059.001, T1053.005) — achieved full containment in 54 minutes; produced a formal incident report documenting attacker timeline, IOC list, MITRE ATT&CK mapping, and 5 remediation recommendations

pfSense Network Security & WAF Lab

Feb 2026 – Mar 2026

- Configured pfSense CE firewall with IDS/IPS rules, ACL policies, and network segmentation; deployed SafeLine WAF to protect web-facing services and validated blocking logic through controlled attack simulations
- Conducted a formal security risk assessment against the lab environment; produced hardening guidelines and security policy documentation aligned to NIST CSF; documented all configuration decisions with rationale for each control

EDUCATION

St. Clair College

Windsor, ON

Diploma: Computer Systems Technician – Networking | GPA: 3.2/4.0

May 2023 – Aug 2024

EXTRACURRICULAR ACTIVITY

Cybersecurity Blog — Published in InfoSec Write-ups on Medium | [The KQL Query That Caught 260 Brute Force Attempts in Microsoft Sentinel](#) | [How I Built a SOAR Automation in Microsoft Sentinel That Responds Without a Single Click](#)

BSides Ottawa — Annual cybersecurity conference attendee; networking with security professionals, staying current on emerging threats, and engaging with the Ottawa security community.

AWARDS & RECOGNITION

St. Clair College Honors Award

St. Clair College | Windsor, ON

- Recognized for academic excellence in the Computer Systems Technician – Networking diploma program

BSides Ottawa CTF — 6th Place of 32 Teams

May 2025

Hack The Box | KPMG Ottawa

- Competed as part of team BruteForce-- — solved **17/29 challenges across Web, Forensics, Reversing, and Crypto**; finished 6th of 32 teams with 6,075 points; contributed to binary analysis and forensics challenges
