TECHNICAL SKILLS

Cybersecurity & Defensive Operations: Threat Detection • Log Analysis & Correlation • Incident Triage & Response Basics • SIEM Operations (Splunk) • Alerting & Dashboard Creation • Endpoint Hardening • Access Control Troubleshooting • MFA Implementation • Blue Team Workflows • Security Monitoring • Incident Documentation • Basic Threat Hunting
Network Security & Traffic Analysis: TCP/IP • DNS • DHCP • VPN Troubleshooting & Configuration • Wi-Fi Security Diagnostics • Packet Capture & Deep Inspection (Wireshark) • Network Traffic Monitoring • Basic Firewall / ACL Concepts • OSI & TCP/IP Models • ICMP
Identity & Access Management (IAM): Active Directory (User Provisioning • Access Controls • Password & Account Management) • Microsoft 365 Security (Outlook, Teams, OneDrive) • MFA Setup & Enforcement • User Onboarding / Offboarding • RBAC Basics
SIEM, Monitoring & Lab Platforms: Splunk (Log Ingestion • SPL Queries • Custom Dashboards • Alert Rules) • TryHackMe (Blue Team & SOC Learning Paths) • Hack The Box (SOC Analyst & Detection Modules) • VMware / VirtualBox (Enterprise Simulation Labs) • Ticketing Systems • Microsoft 365 Admin Center
Endpoint & Hardware Security: Windows 10/11 Security Administration • Desktop / Laptop / Peripheral Troubleshooting & Repair • Hardware Component Replacement (RAM, Storage) • Device Hardening Basics • IT Asset Tracking & Inventory • Preventative Maintenance

EXPERIENCE

Fulfillment Associate — Oct 2024 – Present
Amazon — *Ottawa, ON*

- Acted as frontline technical responder in high-volume production facility, rapidly diagnosing and resolving device connectivity, hardware failures, and access issues to maintain secure and uninterrupted operations.
- Identified, documented, and escalated potential security or authentication anomalies while following strict compliance and escalation protocols.
- Delivered consistent, clear communication under tight deadlines in a team-oriented, high-pressure environment.

Helpdesk Analyst (CO-OP) — Jan 2024 – April 2024
St. Clair College — *Windsor, ON*

- Served as primary incident responder for end-users, efficiently triaging and resolving Level 1 hardware, software, network, and Microsoft 365 security/access issues via ticketing system.
- Managed secure user lifecycle in Active Directory — provisioning accounts, enforcing password policies, configuring MFA, and troubleshooting access controls.
- Provided hands-on user training on secure practices and documented all resolutions for knowledge sharing and audit readiness.

Cybersecurity & Network Technician (Academic Lab Experience) — Jan 2024 – Aug 2024
St. Clair College — *Windsor, ON*

- Conducted in-depth network vulnerability and connectivity diagnostics using TCP/IP tools and Wireshark packet-level analysis in enterprise-simulated environments.
- Configured and hardened virtualized infrastructure, applied system patches, replaced hardware components, and documented security configurations and network diagrams.
- Independently researched and mitigated configuration vulnerabilities using vendor documentation and technical resources.

EDUCATION

St. Clair College — Windsor, ON
Computer System Technician - Networking, GPA - 3.2/4.0 — *May 2023 - August 2024*

CERTIFICATES

CompTIA Security+ Dec 2025
CompTIA *Click - Show Credentials*

ISC2 - CC Jan 2026
LinkedIn *Click – Show Credentials*

CySA+ Mar 2026
CompTIA *Click – Expected*

PROJECTS

Splunk SIEM & Defensive Labs Nov 2025 - Present

- Deployed and configured Splunk environments to ingest and analyze logs from simulated systems and networks.
- Built custom searches, correlation rules, and dashboards to detect anomalies, suspicious patterns, and potential security events.
- Practiced full incident lifecycle workflows — alert triage, investigation, documentation, and basic containment — using real-world log formats and attack simulations.

TryHackMe & Hack The Box – Blue Team / SOC Focus Jan 2025 - Present

- Completed Blue Team paths on TryHackMe, focusing on incident handling, network defense, and Splunk-based threat detection in virtual labs.
- Tackled Hack The Box SOC Analyst modules, practicing detection engineering, log analysis, and triage of simulated attacks to strengthen defensive skills.

EXTRA-CURRICULAR ACTIVITIES

Technical Community Involvement & Blogging Apr 2025 - Present
Ottawa

- Actively participate in online cybersecurity, networking, and IT operations communities, sharing knowledge and engaging in discussions on threat trends and tools.
- Write blogs on cybersecurity topics, including log analysis basics, Splunk detection techniques, threat hunting insights, and blue-team lab walkthroughs to document learning and contribute to the community.

AWARDS AND RECOGNITION

Honors Award Sep 2023
St. Clair College

LANGUAGES

English, Hindi, Gujarati **French** (Level 1/8, Beginner working proficiency)
