RONAK MISHRA

ronakmishra1077@gmail.com | LinkedIn | Portfolio | +1 226-975-3578 | Ottawa, ON (Willing to Relocate)

TECHNICAL SKILLS

SIEM & Security Monitoring: Splunk, Wazuh SIEM, Log ingestion and correlation, Security alert triage, Incident investigation, SOC monitoring operations
Threat Detection & Frameworks: MITRE ATT&CK framework, Threat hunting fundamentals, Indicator of Compromise (IOC) analysis, Malware behavior analysis, Incident response lifecycle
Networking & Traffic Analysis: TCP/IP, DNS, HTTP / HTTPS, DHCP, ARP, Network traffic monitoring, Packet inspection
Security Tools: Splunk, Wazuh, Wireshark, Nmap, Sysmon, Windows Event Viewer
Operating Systems: Windows 10, Windows Server, Linux (Ubuntu, Kali)
Security Log Analysis: Windows Security Logs, Authentication logs, Endpoint telemetry, Firewall logs, DNS queries
Programming / Scripting: Python (basic security automation), Bash (Linux automation)

EXPERIENCE

Fulfillment Associate Oct 2024 – Present
Amazon *Ottawa, ON*

- Served as a Problem Solver in a high-volume fulfillment center, identifying and resolving inventory discrepancies, missing items, damaged products, and scanning errors to maintain accurate workflow operations.
- Investigated non-scannable or mislabeled items using internal systems to relabel, reprocess, or remove defective inventory, preventing downstream operational issues.
- Conducted root cause analysis on recurring inventory and workflow issues and collaborated with team leads to implement corrective actions and improve operational efficiency.
- Monitored inventory records and documented discrepancies and resolutions in real-time systems to ensure accurate tracking and reporting.
- Maintained strong attention to detail and adherence to safety procedures while working in a fast-paced environment with strict operational targets.

Helpdesk Analyst (CO-OP) Jan 2024 – April 2024
St. Clair College *Windsor, ON*

- Served as first point of contact for technical issues via ticketing system and in-person support.
- Diagnosed and resolved Level 1 hardware, software, and network connectivity issues across Windows-based environments.
- Assisted with Microsoft 365 support including Outlook access, Teams collaboration issues, and MFA setup guidance.
- Performed password resets and account support in Active Directory following established security procedures.
- Reproduced user-reported issues and applied documented troubleshooting steps before escalating complex cases.
- Prepared and configured desktops and laptops for new users, including software installation and peripheral setup.
- Maintained accurate asset tracking documentation and ensured organized IT storage areas.
- Communicated technical solutions in clear, non-technical language to users of varying skill levels.

Cybersecurity & Network Technician (Academic Lab Experience) Jan 2024 – Aug 2024
St. Clair College *Windsor, ON*

- Supported structured lab environments by diagnosing hardware failures and network connectivity issues.
- Practiced troubleshooting wired and wireless network problems using TCP/IP diagnostics and packet inspection tools.
- Configured virtualized environments to simulate enterprise infrastructure scenarios.
- Assisted with system reimaging, patch updates, and hardware component replacements.
- Researched and independently resolved unfamiliar configuration errors using vendor documentation and technical resources.
- Maintained network diagrams and documented lab infrastructure setups.

EDUCATION

St. Clair College Windsor, ON
Computer System Technician - Networking, GPA - 3.2/4.0 *May 2023 - August 2024*

CERTIFICATES

CompTIA Security+ Dec 2025
CompTIA *Click - Show Credentials*

ISC2 - CC Jan 2026

CySA+ Mar 2026
CompTIA *Click – Expected*

PROJECTS

Home Security Operations Center (SOC) Lab

*Designed and deployed a **personal SOC environment simulating enterprise security monitoring and incident detection workflows**.*

Responsibilities:

- Built a virtualized SOC environment with Windows and Linux endpoints generating real system and security logs.
- Configured centralized log collection and SIEM monitoring using Splunk and Wazuh.
- Implemented Sysmon for enhanced endpoint telemetry and event visibility.
- Simulated attack scenarios including:
  - Brute force authentication attempts
  - Privilege escalation
  - Suspicious PowerShell execution
  - Reverse shell connections
- Monitored alerts, analyzed logs, and investigated potential threats using SOC investigation methodologies.
- Practiced incident triage and escalation procedures similar to real SOC operations.
- Documented incidents, attack timelines, and mitigation strategies.
- Documented complete network diagrams, configuration steps, and troubleshooting playbooks for future reference and team use.

Skills Applied: SIEM monitoring • Incident response • Threat detection • Log analysis • SOC workflow

Splunk SIEM Threat Detection Project

Configured Splunk SIEM to monitor and analyze security logs from Windows endpoints.

Hands-on Experience:

- Collected Windows Event Logs and Sysmon telemetry into Splunk.
- Developed custom Splunk queries (SPL) to detect suspicious activity.
- Created dashboards to visualize:
  - Authentication failures
  - Endpoint activity
  - Network connections
- Investigated suspicious alerts including:
  - Multiple failed login attempts
  - Unusual command execution
  - Unauthorized privilege escalation
- Conducted alert triage and log correlation to determine potential threats.
- Documented investigation steps and simulated escalation to SOC Tier 2.

Wazuh SIEM & Host Intrusion Detection Deployment

Deployed and configured Wazuh SIEM for host-based threat detection and security monitoring.

Key Experience:

- Installed Wazuh Manager and endpoint agents across multiple systems.
- Monitored file integrity, authentication events, and system activity.
- Investigated alerts related to:

Unauthorized file modifications

SSH brute force attempts

Suspicious login activity

- Correlated alerts with MITRE ATT&CK tactics and techniques.
- Created dashboards for real-time security monitoring.

EXTRA-CURRICULAR ACTIVITIES

Cybersecurity Community Involvement Apr 2025 - Present

Ottawa

- Participate in online cybersecurity communities discussing SOC operations, SIEM technologies, threat detection, and incident response practices.
- Share insights and learning through discussions on log analysis, MITRE ATT&CK techniques, and security monitoring using tools such as Splunk and Wazuh.

Cybersecurity Blog - Medium Feb 2026 - Present

Ottawa

- Technical articles on security monitoring, SIEM architecture, and threat detection.
- Example article: Understanding SIEM: A Practical Look at Security Information and Event Management in Cybersecurity
